

Geographical Area Coverage Including Selection of Upazila with Justification

The Extension Component of the National Agricultural Technology Program- Phase II Project (NATP-2) aims to establish a decentralized, demand-led, knowledge-based pluralistic extension service with particular focus on marginal and small farmers based on the experience and lesson learnt in NATP: Phase-I. The geographical area of NATP: Phase-II has been selected on the basis of following criteria:

- (i) High potential for increasing crop, livestock and fish yield and productivity through improvement of existing farm practices;
- (ii) High scope for intensification and diversification through dissemination of available knowledge and technologies;
- (iii) High potential for high value crop production and developing agri-business;
- (iv) Farming population dominated by small and marginal farmers and ample scope for improvement of livelihoods of vast farming community;
- (v) Highly responsive farming community eager to find and adopt better options to improve livelihoods and alleviate poverty and malnutrition;
- (vi) Relatively less developed area in agriculture due to inadequate development initiatives with very limited support of development projects;
- (vii) Includes climatically distressed (drought, flood, water logged and salinity prone) areas with high potential for climate change resilient technologies and extension services; and
- (viii) Ease of communication and accessibility.
